obesity, Comparison of weight in middle age, weight at 18 years, and weight change between, in predicting subsequent 14 year mortality and coronary events: Caerphilly Prospective Study, **344**
Obesity and other health determinants across Europe: The EURALIM Project, **424**
Obesity: trend in inequality, **637**
Relation of weight gain and weight loss on subsequent diabetes risk in overweight adults, **596**
obesity measurement, Accuracy of the estimated prevalence of obesity from self reported height and weight in an adult Scottish population, **143**
obesity prevalence, Accuracy of the estimated prevalence of obesity from self reported height and weight in an adult Scottish population, **143**
occupation, Incidence of myocardial infarction in women. A cohort study of risk factors and modifiers of effect, **104**
olive oil, Olive oil, diet and colorectal cancer: an ecological study and a hypothesis, **756**
The role of olive oil in lowering cancer risk: Is this real gold or simply pinchbeck?: *editorial*, **726**
onchocerciasis, Treatment with ivermectin: what works in one community may not work in another, **79**
outreach clinics, Evaluation of outreach clinics held by specialists in general practice in England, **149**

pancreatic cancer, Coffee, K-*ras* mutations and pancreatic cancer: A heterogeneous aetiology or an artefact?: *editorial*, **654**
Coffee, pancreatic cancer, and K-*ras* mutations: updating the research agenda: *editorial*, **656**
Coffee, pancreatic cancer and the question of causation: *editorial*, **650**

passive smoking, Passive smoking at work: the short-term cost, **673**
payment, The effect of a direct payment or a lottery on questionnaire response rates: a randomised controlled trial, **71**
peptic ulcer, Overall mortality among patients surviving an episode of peptic ulcer bleeding, **130**
photographs, The JECH Gallery: a call for public health photographs: *editorial*, **801**
photography, Images and reflections: photography in the pursuit of public health, **846**
physical activity, Posters can prompt less active people to use the stairs, **942**
physicians' incentive plans, Sources of influence on medical practice, **623**
physicians' practice patterns, Sources of influence on medical practice, **623**
plasma lipids, Apolipoprotein E phenotype, cholesterol and breast and prostate cancer, **938**
playground injuries, Severity of fall injuries on sand or grass in playgrounds, **475**
Poisson regression, Air pollution and mortality in a cohort of patients with chronic obstructive pulmonary disease: a time series analysis, **73**
Poland, Changing mortality patterns in East and West Germany and Poland. I: Long term trends (1960–1997), **890**
Changing mortality patterns in East and West Germany and Poland. II: Short-term trends during transition and in the 1990s, **899**
polio virus, Haematopoietic cancer and medical history: a multicentre case control study, **431**
pollution, Community exposures to chemical incidents: development and evaluation of the first environmental public health surveillance system in Europe, **870**
population-based interventions, Do we learn our lessons from the population-based interventions?: *editorial*, **562**
What is the "golden standard" for assessing population-based interventions?—problems of dilution bias, **617**
population-based study, Overall mortality among patients surviving an episode of peptic ulcer bleeding, **130**
postal questionnaires, What are the characteristics of general practitioners who routinely do not return postal questionnaires: a cross sectional study, **940**
posters, Posters can prompt less active people to use the stairs, **942**
preferences, Treatment with ivermectin: what works in one community may not work in another, **79**
pregnancy, Nutrient intakes during pregnancy: the influence of smoking status and age, **17**
prenatal care, Reduced risk of low weight births among indigent women receiving care from nurse-midwives, **233**
prevalence, Diabetes prevalence and socioeconomic status: a population based study showing increased prevalence of type 2 diabetes mellitus in deprived areas, **173**
Psychosocial aetiology of chronic disease: a pragmatic approach to the assessment of lifetime affective morbidity in an EPIC component study, **114**
primary care, Social and gender variation in the prevalence, presentation and general practitioner provisional diagnosis of chest pain, **714**
The epidemiology and experience of atopic eczema during childhood: a discussion paper on the implications of current knowledge for health care, public health policy and research, **581**
primary health care, Sources of influence on medical practice, **623**
Validity of self reported utilisation of primary health care services in an urban population in Spain, **544**
prospective study, Comparison of weight in middle age, weight at 18 years, and weight change between, in predicting subsequent 14 year mortality and coronary events: Caerphilly Prospective Study, **344**
prostate cancer, Apolipoprotein E phenotype, cholesterol and breast and prostate cancer, **938**
psychological distress, Unemployment and psychological distress one year after childbirth in France, **185**
psychometrics, Exploring health preferences in sociodemographic and health related groups through the paired comparison of the items of the Nottingham Health Profile, **537**
public health, A call for glossaries in public health: *editorial*, **561**
A minimum income for healthy living, **885**
A ready man?—The evidential and ethical basis for conferences: *editorial*, **322**
Balkans briefing 6. Picking up the pieces: reflections on the initial stages of the reconstruction of the health care system in Kosovo, July 1999, **705**

Inequality and the social environment: a reply to Lynch *et al*: *editorial*, **411**
Leadership for health. How can we ensure that the values and principles of public health become central to health and social policy?, **703**
New century, new challenges: *editorial*, **1**
Social capital, economic capital and power: further issues for a public health agenda: *editorial*, **409**
Social capital—Is it a good investment strategy for public health?: *editorial*, **404**
Still publishing after all those years: *editorial*, **881**
The technological paradox of health inequality, and a probe with a practical tool: *editorial*, **882**
Public Health Observatories, Public Health Observatories—the key to timely public health intelligence in the new century: *editorial*, **724**

quality of health care, Excess mortality from avoidable and non-avoidable causes in men of low socioeconomic status: a prospective study in Korea, **166**
quality of life, Freedom and quality of life: *editorial*, **564**
questionnaire response, The effect of a direct payment or a lottery on questionnaire response rates: a randomised controlled trial, **71**

radon, Childhood leukaemia in areas with different radon levels: a spatial and temporal analysis using GIS, **822**
randomised controlled trial, Smoking cessation at the workplace. Results of a randomised controlled intervention study, **349**
randomised trial, A sustainable programme to prevent falls and near falls in community dwelling older people: results of a randomised trial, **227**
rank, Occupational risk factors for ill health in Gulf veterans of the United Kingdom, **834**
recall, How accurate is self reported birth weight among the elderly?, **639**
refugee camps, The Communicable Disease Surveillance System in the Kosovar refugee camps in the former Yugoslav Republic of Macedonia April–August 1999, **52**
refugees, Balkan briefing (part 4). Kosovo refugees in the North West region of the United Kingdom, **314**
Balkans briefing number 5. Seeking refuge (Macedonia, 9–25 June 1999): the changing needs of humanitarian aid in the face of the peace, **469**
regional differences, Mortality after acute myocardial infarction is lower in metropolitan regions than in non-metropolitan regions, **590**
renal transplantation, Absence of economic barriers does not reduce disparities in the access to renal transplantation: A population based study in a region of central Italy, **157**
research methods, Who's afraid Of Thomas Bayes?, **731**
research utilisation, How are policy makers using evidence? Models of research utilisation and local NHS policy making, **461**
research/policy interface, How are policy makers using evidence? Models of research utilisation and local NHS policy making, **461**
respiratory illness, Hospital admissions for asthma and chronic obstructive airways disease in East London hospitals and proximity of residence to main roads, **75**
respiratory symptoms, Social class, smoking and the severity of respiratory symptoms in the general population, **340**
risk factor surveillance, Obesity and other health determinants across Europe: The EURALIM Project, **424**
risk factors, Individual and occupational determinants of low back pain according to various definitions of low back pain, **215**
risk management, Clinical incidents and risk management—a public health issue: *editorial*, **242**
rural health, Determinants of leisure time physical activity in rural compared with urban older and ethnically diverse women in the United States, **667**
Russia, A tale from Russia . . . and beyond: *editorial*, **721**
Alcohol consumption in the Baltic Republics, **361**
Epidemiology, medical demography and data quality issues in the former Soviet Union: *editorial*, **722**
Is there epidemiology in Russia?, **740**

seasons, Housing standards and excess winter mortality, **719**
self assessed health, The predictive value of self assessed general, physical, and mental health on functional decline and mortality in older adults, **123**
self rated health, Self rating of health is associated with stressful life events, social support and residency in East and West Berlin shortly after the fall of the wall, **575**
The health impact of German unification: still much to learn: *editorial*, **565**
What is the lag time between income inequality and health status?, **318**
self reported utilisation, Validity of self reported utilisation of primary health care services in an urban population in Spain, **544**
self reports, Accuracy of the estimated prevalence of obesity from self reported height and weight in an adult Scottish population, **143**
seroconversion, Seroconversion and seroreversion in IgG antibodies to *Helicobacter pylori*: a serology based prospective cohort study, **444**

sero-reversion, Seroconversion and seroreversion in IgG antibodies to *Helicobacter pylori*: a serology based prospective cohort study, **444**
sex inequalities, Sex differences in risk factors, treatment and mortality after acute myocardial infarction: an observational study, **912**
sex ratio, Declining male births with increasing geographical latitude in Europe, **244**
sick building syndrome, Emergence and preservation of a chronically sick building, **552**
sickness absence, Working conditions and sickness absence: the need for action oriented research: *editorial*, **482**
sickness absenteeism, Sick but yet at work. An empirical study of sickness presenteeism, **502**
sickness presenteeism, Sick but yet at work. An empirical study of sickness presenteeism, **502**
smoking, A survey of smoking among Italian doctors: *letter*, **320**
Freedom and quality of life: *editorial*, **564**
Smoking and the compression of morbidity, **566**
Social class, smoking and the severity of respiratory symptoms in the general population, **340**
smoking cessation, Smoking cessation at the workplace. Results of a randomised controlled intervention study, **349**
social capital, Epidemiology of participation: an Australian community study, **414**
Inequality and the social environment: a reply to Lynch *et al*: *editorial*, **411**
Social capital, economic capital and power: further issues for a public health agenda: *editorial*, **409**
Social capital: the role of narrative and historical research: *editorial*, **401**
Social capital—Is it a good investment strategy for public health?: *editorial*, **404**
social class, Changes in social inequalities in health in the Basque Country, **437**
How accurately do adult sons and daughters report and perceive parental deaths from coronary disease?, **859**
Mortality differences by parental social class from childhood to adulthood, **525**
